DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. "Group comprising" (structure comprising) is an improper Markush group. *Ex parte Dotter*, 12 USPQ 382 (POBA 1931).

Additionally, it is unclear in the diagrams of claims 6 and 7 if the moiety "N-" indeed is intended to indicate "N-CH₃" and in claim 8 if the moiety "-(CH₂)_a-" indeed is intended to indicate "-(CH₂)_a-CH₃."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by DE 1963399 A (CAPLUS abstract). The reference teaches applicant's compound:
RN=32797-22-1.

Claim 8 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 63037185 A2 (CAPLUS abstract). The reference teaches applicant's compounds: RN=116274-40-9; 116274-44-3.

Claim 8 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 449450 A1 (CAPLUS abstract). The reference teaches applicant's compound: RN=138807-23-5.

Claim 8 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 06134322 A2(CAPLUS abstract). The reference teaches applicant's compound: RN=159613-51-1.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1621

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over EP 449450 A1 (CAPLUS abstract).

Applicant claims a set of compounds described by the formula of claim 8.

EP 449450 teaches an adjacent homolog of applicant's compound: RN=141052-46-2. That is, the compound of the prior art has an alkyl chain one carbon longer than the corresponding chain of the instant compound.

Adjacent homologs are considered to be obvious absent unexpected results. *In re Henze*, 85 USPQ 261, 263 (CCPA 1950). Members of a homologous series must possess unexpected properties not possessed by the homologous compounds disclosed in the prior art. *In re Hass*, 141 F.2d 127, 60 USPQ 548 (CCPA 1980).
